INTRODUCTION

David and Diane Mann founded Mann's Manufacturing, Inc. in 1989 to design products for the hospitality industry. The business draws on their combined expertise and professionalism, including years of experience in fine craftsmanship, portable bar design and construction, along with a commitment to integrity and service.

David provides technical engineering support to prospective customers with their projects - sharing his knowledge and expertise to ensure the customer chooses the best product for their needs.

The goal of Mann's Manufacturing, Inc. is to produce a high-quality product, backed by a 3-year construction warranty and expected service life of over 20 years.

Mann's Manufacturing, Inc. continues to produce a full line of portable bars. Mann's products are found in the finest hotels, restaurants, casinos and private clubs throughout the United States. Their products are distinctive for the ingenuity of Mann's design and sound construction. The combination of exceptional quality, unique features and excellent customer service has earned Mann's products a loyal customer base throughout the nation.

BAR TYPES

Can and Bottle Bar

This bar is designed to be used with bottles, canned soda and mixers. Standard with this bar is a stainless steel, insulated ice chest (no cold plate) - NSF approved.

Pre-mix Bar

This bar is designed to facilitate a pre-mix soda system and bar gun. It comes with a stainless steel insulated drop-in unit and a 7-pass sealed in cold plate - NSF approved.

Post-mix Bar

Post-mix bars are designed to facilitate a post-mix soda system with pumps, carbonator and large tank. It comes with a stainless steel drop-in ice chest and a 7 or 8 pass sealed in cold plate - NSF approved.

WARRANTY

We warranty our bars to be of sound construction and design - to continue to produce good service for a period of 36 month, or 3 years.

Exclusions include deliberate abuse, altering equipment not manufactured by Mann's Manufacturing, Inc., or any damage caused by neglect, accident or vandalism.

CONSTRUCTION

The construction of a Mann's bar continues to be produced the old-fashioned way - by hand, with excellent craftsmanship in a time tested manner.

All bars are cut individually, by hand, to an exact size and layed up (assembled) by hand. Laminates and veneers are matched and layed up for best review.

Mouldings are matched and cut to the exact size and fitted for appearance and style. Mann's has a very wide and varied selection of mouldings and veneers - we take pride in being able to match almost any motif that is desired.

We continue to use the very best woods and laminates available, in order to create the strongest and most appealing portable bar, manufactured anywhere today.

Our bars are created with the service person in mind. Designs that offer maximum service with minimum effort.

ECONO BAR

E - 48

E - 60

Front

MANN'S ECONO PORTABLE BAR

Our Econo bar is manufactured from the exact same high end material all other bars in our line are made from which is 95 P.S.I. M.D.O. Engineered Wood.

We use the same high tech casters and laminates that are used when manufacturing our Classic Series Bars.

The difference is in the time and labor. the Econo bar has straighter lines, which reduces production time, however, is a savings to our customers.

The end result is the same as in all of our portable bars...hard working with a very long service live.

Available in 4-feet and 5-feet only.

CUSTOM BARS

Mayflower Bar

"...I thank you for your exceptional care in making this wonderful piece of furniture. Also, thank you for your personalized service, it was a pleasure doing business with your company. I would be happy to recommend everyone to your company."

*Paul Landsberg
Director Food & Beverage
Mayflower Retirement Community
Winter Park, FL*

Mann's custom bar -
Arlene Schnitzer Concert Hall
Portland, Oregon

"The Schnitz" as it is lovingly called by Portland residents, is the most distinctive and ornate of the Portland Center for Performing Arts' (PCPA) four theaters. The PCPA is nationally recognized as one of the top 10 performing arts centers in the nation, with over 900 performances in music, theatre, dance and lectures and over one million visitors annually. "Renee Pace MERC - Project Assistant. The PCPA theaters are managed and maintained by the Metropolitan Exposition-Recreation Commission (MERC)."

"Hopefully whatever prestige the Schnitzer holds, will reflect the prestige your fine quality workmanship and stellar service overall deserves."...Renee Pace.

— STEEL FRAME BARS —

-STEEL FRAME-

STAINLESS STEEL PORTABLE BAR

Mann's stainless steel portable bar has a welded box steel frame. The back of the bar and under the bar is all stainless steel.

Our steel framed - stainless steel bars are available in sizes from 4-feet to 10-feet with the configuration to suit the needs of the customer.

The exterior bar covering could be; laminate, stain & lacquer, paint, tile, or whatever the customer's needs are.

The steel framed - stainless steel bar is a custom item and built on a per-order basis. The quote could include options such as; water system, sink, electrical system, soda system. Most accommodations are possible.

Because of the metals market changing daily, a dated quote will be valid for 30 days only.

This steel and stainless steel portable bar is indeed armor proof and meets health rules and regulations.

Regal Ice Caddy

RIC

Interior - white laminated walls and a white metal floor. Easy viewing and can be hosed out for simple cleaning.

BackSide or Bartender Area - Laminated in Black Crystal. Will not show glass rings or fingerprints. Custom product for Mann's.

Ice Chest - 15x22 stainless steel drop-in unit for can and bottle bar - 80lb capacity. 15x22 stainless steel drop-in unit with 7-product cold plate and bar gun. 65lb capacity. 21x23 stainless steel drop-in unit - 120lb capacity. Note: All drop-in units come insulated, with a center drain for melted ice water.

Casters - 5"x2" smart wheels - set of 4. 10-foot model has 6"x2" casters - set of 4. Gray non-marring tire - grease fittings - top race and axle. Will roll over any surface and not cut carpets.

Speed Rails - stainless steel detachable. Sizes are 22", 32", 42". Assigned to specific bar sizes. Standard equipment on bars.

Chip Guard - above service counter and at base of back side of bar.

Bumper System - 1 1/2" stand-off bumper system 3-sided. 4-foot bar has corner rubber guards 4-sided. No base bumper is applied when a foot rail is attached.

Weight Capacity - all bars are designed to safely allow up to 2500 pounds of product inside bar. Caution should be taken when top loading bar.

Weight of Bars - approximately 2/3 of 100 pounds per foot. Weight of Crate - approximately 150 pounds per bar. Example: 4-foot crated bar shipping - 400 pounds.

Finish - Standard grade laminate. Colors - Cherry, Mahogany, or Black Crystal laminate in a Satin finish. Mann's Custom Black Crystal laminate, standard on serving counter and in bartender work area.

FREQUENTLY ASKED QUESTIONS (FAQ)

- 1.** Can I have two bartender stations?
Yes. Only on 6-7-8-10 foot models. This option will require a second ice-chest. Inquire about price.
- 2.** Can I have electric outlets on our bar?
Yes. An electric system would be installed with 110 volt and appointed outlets. Inquire about price.
- 3.** Can I have the Crown, Rose, or Wreath without the onlay design?
Yes.
- 4.** Can I have a water system on our bar?
Yes. The water system would include hot and cold running water. The water system requires an electrical system installed as well. Inquire about price.
- 5.** Can I have a shelf in our bar?
Yes. However, we do not recommend shelving. We have found as the shelf is fixed, other items are not reachable and you loose space which is valuable.
- 6.** Can you match the custom stain/paint color of our walls, or woodwork trim?
Yes. If the color is a standard color from a named company. Company name, color and number required.
No. If the color has a specialized, custom glaze, paint or stain, then we cannot, as the originator usually will not release the components in order for us to duplicate the color.
