ICE-GLIDE, Cold Vault

This product is a multipurpose shelving system used for a variety of products and sizes. However, the Ice-Glides are used on angled shelves only and is gravity fed. It is highly customizable to accommodate multiple brands with unobstructed visibility using a slim front lens across the entire length.

- Idea for coolers or cold vaults (angled shelves only).
- For use with various products and sizes.
- Uses a slim transparent front lens.
- Uses versatile repositional divider walls.
- Fast setup with snap-fit components.
- Gravity fed (product naturally glides forward).

Visi-Slide Shelf Glides

Visi-Slides are the #1 industry standard glide system for single serve merchandising. It is a gravity-fed system that sits directly on angled shelves in cold vaults, coolers, or ambient shelf applications. All Visi-Slides are available in different channel widths to accommodate the wide range of products in the market.

- Idea for coolers or cold vaults.
- Modular tracks and break offs to fit most shelf sizes.
- Proprietary internal slip agent ensures lasting performance of glide.
- Glide has clear front ring allowing maximum brand exposure.
- Glide is made of virgin polypropylene and is easily recycled.
- Glide size can be customized using the breakaway sections.
